

McFarlane Aviation Acquires Airglas

MEDIA CONTACT: Mackenzie Wehrman | Media@Victor-Sierra.com

For Immediate Release:

September 30, 2026 | BALDWIN CITY, KANSAS

McFarlane Aviation, a Victor Sierra Company, has acquired Airglas, Inc., the Anchorage, Alaska-based manufacturer of fiberglass skis, heavy-duty nose forks, and cargo and fuel pods for backcountry and military aircraft.

Airglas will continue to manufacture its full product line in Anchorage with its existing team. For operators who have relied on these products for decades, the parts they order and the people building them remain unchanged. Airglas has earned its standing among pilots who operate off-airport, and that standing was built in Alaska by people who fly there.

"We have spent decades building equipment for pilots who land where there is no runway," said Shane Langland, Owner of Airglas. "Joining McFarlane lets our team keep doing that work here in Alaska, while McFarlane's distribution network puts our products in reach of pilots and mechanics around the world."

Airglas's focus on pilots who fly off-airport, onto snow, gravel, and everything in between, does not change. What changes is access: more pilots will be able to buy Airglas products quickly, wherever they are based.

Airglas

McFarlane already supports bush airframes with products such as Alaskan Bushwheels, tailwheel suspension systems, and main landing gear for Cessna, Piper, Maule, Husky, and other popular airframes. Airglas extends that support with skis, nose forks, and cargo pods for operations on snow, tundra, and other off-airport terrain. Airglas products are built to standards developed for military aircraft, giving GA operators landing gear and equipment tested well beyond typical service conditions.

Airglas products are available now through McFarlane Alaska and will be available through McFarlane Aviation soon.

- **Fiberglass Skis:** Multiple models for Cessna, Piper, Maule, Husky, and other airframes.
- **Heavy-Duty Nose Forks:** Options for Cessna, Piper, and GippsAero Airvan aircraft, allowing installation of larger tires.
- **Cargo & Fuel Pods:** Added storage and fuel capacity for hunting, fishing, and camping trips.

"Adding Airglas to our family of brands strengthens our commitment to the Alaska market, expands our general aviation and military business, and advances our mission to keep customers flying," said Scott Still, President of Victor Sierra. "Wherever our customers fly, we want the equipment they depend on within easy reach."

Full product and ordering information is available at Airglas.com.

About McFarlane Aviation

McFarlane Aviation provides high-quality FAA-PMA aircraft parts and accessories for general, commercial, and specialty aviation. With brands like Flight-Resource (MT Propellers), Airforms, and Airglas, McFarlane delivers reliable aftermarket solutions backed by engineering excellence. As part of Victor Sierra, McFarlane continues to serve operators across general and business aviation. Learn more at McFarlaneAviation.com.

Victor Sierra is the parent company of APS, Av8, McFarlane Aviation, and Tempest Aero Group, a family of brands recognized for designing, manufacturing, servicing, and distributing proprietary aftermarket components for a wide range of aviation markets.
