

McFarlane Aviation Releases FAA-PMA Approved Door Handles and Washer for Cessna Aircraft

MEDIA CONTACT: Mackenzie Wehrman | Media@Victor-Sierra.com

For Immediate Release:

December 04, 2025 | BALDWIN CITY, KANSAS

McFarlane Aviation is proud to announce the release of our new FAA-PMA approved Cessna Door Handle part numbers [MC0711861-1-A](#) (aluminum), [MC0711861-1-G](#) (gray), and [MC0711861-1-B](#) (black), as well as washer part number [MCS1438-16](#) which are direct replacements for OEM components that commonly suffer from spline wear and failure. These components are eligible for a wide range of Cessna 170 thru 337 aircraft and are available online now!

The OEM cast aluminum door handles are known to wear prematurely due to their low-strength material. McFarlane's upgraded handles are precision-machined from billet aerospace-grade aluminum, offering substantially greater strength and durability. The internal spline is precision-cut to reduce backlash and ensure a longer-lasting fit. In place of the difficult to install retaining clip, McFarlane's design uses accessible lock screws for easier installation and a more secure connection.

To complement the handle, McFarlane's replacement washer is also FAA-PMA approved and intended to be replaced alongside the handle due to expected wear. Both parts are designed to modernize, strengthen, and simplify one of the most commonly used access points on Cessna aircraft.

Handles are available in three color options: gray, aluminum, and black, to match your aircraft's interior or exterior styling.
