For Immediate Release:

December 17, 2025 | BALDWIN CITY, KANSAS

McFarlane Aviation is excited to announce a new FAA-PMA approved drawbar now available for Cessna 150 and 152 aircraft. The McFarlane drawbar was uniquely designed to combat the common failure points of the OEM replacement, including broken loop ends or cracking. Both failures result in an inoperable door handle, requiring replacement of your drawbar. Our design incorporates several improvements, including its material, shape, and added washer. Both left and right doors use the same drawbar part number, P/N MC0413406-8.

The OEM drawbar, P/N [0413406-8](#) and P/N [0413406-3](#), is made of aluminum, compared to our stronger stainless steel material that is less prone to cracking or failure, resulting in a longer lifespan. We also redesigned the shape of our drawbar to prevent popping on the door handle during operation, which creates a wear spot and bends the drawbar (resulting in failure). Lastly, we added a unique spacer for an improved fit and less noise during use!

Full eligibility listings and cross-reference tables are available at McFarlaneAviation.com.

About McFarlane Aviation

McFarlane Aviation provides high-quality FAA-PMA aircraft parts and accessories for general, commercial, and specialty aviation. With brands like CJ Aviation, Flight-Resource (MT Propellers), Airforms, and PMA Products, McFarlane delivers reliable aftermarket solutions backed by engineering excellence. As part of Victor Sierra, McFarlane continues to serve operators across general and business aviation. Learn more at McFarlaneAviation.com.

Victor Sierra is the parent company of APS, Av8, McFarlane Aviation, and Tempest Aero Group, a family of brands recognized for designing, manufacturing, servicing, and distributing proprietary aftermarket components for a wide range of aviation markets.
