

Another Exciting Airforms FAA-PMA Approval – Engine Baffles for Piper, Cessna, and Cirrus Aircraft

MEDIA CONTACT: Mackenzie Wehrman | Media@Victor-Sierra.com

For Immediate Release:

December 31, 2025 | BALDWIN CITY, KANSAS

Airforms recently received FAA-PMA approval on engine baffles for Piper PA-28R-201, PA-28R-180, PA-34-200, PA-34-200T, PA-34-220T, PA-28-151, PA-28-181, Cessna CR172XP, C172RS, C172GH, and Cirrus SR22 aircraft. These new baffles are available as a complete replacement kit or standalone replacement pieces. Engine baffles are susceptible to bending and cracking at vulnerable points. The Airforms engineering team has implemented reinforced designs to ensure that your baffles remain in optimal condition for as long as possible. By replacing your baffles, you ensure optimal engine cooling, enhanced performance, and extended lifespan of your engine. Airforms offers a wide range of capabilities with hundreds of FAA-PMA baffle sets for a variety of aircraft, including Cessna, Beech, Piper, Cirrus, Mooney, and Grumman. All baffle assemblies are bare metal finished or powder coated, which enhances corrosion resistance. Their pre-installed seals are available in standard silicone material (multiple color options) or McFarlane's new premium Cowl Saver™ material with Bi-Flex™ technology.

Cowl Saver™ is a low friction baffle seal material featuring 30 times less friction than silicone. This heightened friction transmits engine vibrations directly into the cowl and firewall, resulting in issues such as fastener fretting, fatigue, cracking, chafing, and airframe vibration. Cowl Saver™ material is now available in several different applications, including three-inch rolls, large sheets (for customization), or complete aircraft replacement kits.

Full eligibility listings and cross-reference tables are available at McFarlaneAviation.com.

About McFarlane Aviation

McFarlane Aviation provides high-quality FAA-PMA aircraft parts and accessories for general, commercial, and specialty aviation. With brands like CJ Aviation, Flight-Resource (MT Propellers), Airforms, and PMA Products, McFarlane delivers reliable aftermarket solutions backed by engineering excellence. As part of Victor Sierra, McFarlane continues to serve operators across general and business aviation. Learn more at McFarlaneAviation.com.

Victor Sierra is the parent company of APS, Av8, McFarlane Aviation, and Tempest Aero Group, a family of brands recognized for designing, manufacturing, servicing, and distributing proprietary aftermarket components for a wide range of aviation markets.
