

McFarlane Aviation UNIVERSAL CONTROLS

WHY CHOOSE OUR UNIVERSAL EXPERIMENTAL CONTROLS?

Noncertified Standard Length Push-Pull and Quadrant Style Aircraft Controls

Newest options include throttle, propeller, and mixture applications.

- Perfect for noncertified, homebuilt, and experimental aircraft!
- Built to the same standards as McFarlane certified controls
- High quality materials and tight tolerances
- Drastically outlasts typical noncertified control options
- Standard configurations fit most common installations
- Stocked assemblies reduce lead time compared to custom controls
- Standard configurations available: 48 inch, 60 inch, and 72 inch lengths

Noncertified standard-length controls also available in other styles and configurations, including turn-to-lock, push-to-unlock, lightweight push-pull controls, and Vernier-Assist Throttle and mixture controls.
