For Immediate Release:

December 08, 2025 | BALDWIN CITY, KANSAS

McFarlane Aviation is excited to announce a new line of FAA-PMA approved tachometer cables, now available for a wide range of Cessna 100 and 200 series single-engine aircraft. These improved tach cables replace OEM parts and offer significant performance advantages, extending service life through superior strength and durability with existing systems.

Engineered with a durable, polymer-jacketed casing and proprietary lubricant for smooth operation, [McFarlane's tach cables](#) are built to outperform standard designs. Like the OEM parts they replace, our tach cable assemblies are captive assemblies, with the core having terminals swaged on both ends. This captive design prevents the core from being removed from the conduit and helps eliminate contact and pressure on the tach input for certain sensitive tachometers when compared to non-captive assemblies. These assemblies are built with a core capable of sustaining three times the torque of some OEM designs.

"Our focus was to improve core strength without changing how the cable interfaces with existing tachometer systems," said Christine Lust, Lead Project Engineer at McFarlane Aviation. "The result is a more robust assembly that performs reliably in real-world operating conditions."

Each cable assembly is designed for easy installation from the engine's tach drive housing to the instrument panel. A wide selection of part numbers is available to match various aircraft models and tachometer configurations. Full eligibility listings and cross-reference tables are available at McFarlaneAviation.com.

About McFarlane Aviation

McFarlane Aviation provides high-quality FAA-PMA aircraft parts and accessories for general, commercial, and specialty aviation. With brands like CJ Aviation, Flight-Resource (MT Propellers), Airforms, and PMA Products, McFarlane delivers reliable aftermarket solutions backed by engineering excellence. As part of Victor Sierra, McFarlane continues to serve operators across general and business aviation. Learn more at McFarlaneAviation.com.

Victor Sierra is the parent company of APS, Av8, McFarlane Aviation, and Tempest Aero Group, a family of brands recognized for designing, manufacturing, servicing, and distributing proprietary aftermarket components for a wide range of aviation markets.
