FEDERAL AVIATION ADMINISTRATION -PARTS MANUFACTURER APPROVAL

In accordance with the provisions of Title 14 Code of Federal Regulations (CFR), Part 21 Certification Procedures of Products and Parts, Subpart K, the FAA has found that the design data submitted with your letter dated July 20, 2010, meets the airworthiness requirements of the regulations for the products on which the assemblies' parts are to be installed. We based our finding on Supplemental Type Certificate (STC) SA3284SO, SA3285SO, SA3286SO, SA3287SO dated July 15, 1992, SA02386AT and SA02387AT dated August 29, 2001. Additionally, the FAA has determined that Skybolt Composite Design has established a fabrication inspection system as required by 14 CFR § 21.303(h) at 9000 Airport Blvd., Leesburg, Florida. Therefore, we grant Parts Manufacturing Approval (PMA), which authorizes you to manufacture the assemblies and parts in the enclosed Supplement Number 4.

You are reminded that the provisions of 14 CFR, parts 21 and 45 noted in our PMA letter of approval date March 19, 1997, also apply to the enclosed PMA Listing-Supplement Number 4. Please keep the enclosed supplements with the original PMA letter as evidence of approval to produce the assembly and parts concerned.

Sincerely,

 Mack Riley
Manager, Orlando MIDO

Enclosure: Supplement #4

PARTS MANUFACTURER APPROVAL NO. PQ1422CE
PRODUCTION APPROVAL LISTING – SUPPLEMENT NO. 2

Date: September 30, 2003

----- END OF LISTING -----

Note: Minor design changes (reference 14 CFR part 21 sections 21.93 and 21.95) must be submitted in a manner as determined by the ACO. Major design changes (reference 14 CFR part 21 sections 21.93 and 21.97) to drawings and specifications are to be handled in the same manner as that for an original FAA-PMA.

P.E. Littleton
Manager, Orlando MIDO

-----END-----

Note: The procedures that are acceptable to the type certificate, supplemental type certificate, or TSO authorization holder and their cognizant FAA Aircraft Certification Office, for minor changes to original parts used on type certificated products, are also acceptable for incorporating the same minor changes on identical PMA, replacement parts. The PMA holder must be able to show traceability relating to the TC, STC, or TSO authorization holder on all minor changes incorporated by this procedure. When these procedures are no longer applicable because of completion of the production contract, or termination of the licensing agreement or business relationship, all subsequent minor design changes to the PMA parts are handled in a manner determined by the ACO. Major design changes by the TC, STC, or TSO authorization holder control all major design changes to drawings and specifications (reference 14 CFR §§ 21.93 and 21.97) and are to be handled in the same manner as that for an original PMA.
