

FAA 8130-3 Tag Policy

Export 8130-3 Tags

An FAA 8130-3 tag is an optional tag issued by an FAA representative certifying a part meets FAA approved design data, and the import requirements of the destination country. FAA 8130-3 tags can only be issued for FAA Approved parts. Non-FAA approved articles and standard hardware are not eligible for an 8130-3 tag.

Because some countries require their own domestic approval for imported articles, McFarlane may not be able to provide an 8130-3 tag for all articles to all countries. For example, Brazil has restrictions on the import of modification parts, and EASA (Europe) requires EASA approval for STC'd articles. Some, but not all McFarlane STC's have EASA approval. A Certificate of Conformance can be issued for articles that are ineligible for an 8130-3 tag but the part still doesn't meet the foreign country's import requirements.

Please note:

- If an Export 8130-3 form is required; provide the country of final destination to the DAR/DMIR, for his review, for the part when placing the order.
- You should also tell the designee what the part name and number are as some parts may not be eligible for a tag (8130-3 based on the parts criticality or approval type. (i.e. STC, TSO, critical, life limited,))
- An 8130-3 tag cannot be generated after an order has shipped.
- Copies of tags that were issued and maybe lost, can be provided.
- McFarlane will contact you if an 8130-3 Tag cannot be issued due to a particular country import requirement.

McFarlane strives to ship orders the same day they are received regardless of whether or not export documentation is required. Occasionally orders are delayed due to limited availability of FAA representatives or while waiting on a response from a customer when an 8130-3 tag cannot be provided for all parts. To help avoid delays please specify when ordering whether or not a Certificate of Conformance is acceptable when an 8130-3 tag is not available for all parts on the order.

8130-3 Tag Fees

A \$40.00 fee per shipment applies for all orders that require an 8130-3, regardless of the product's manufacturer.

If an 8130-3 tag is required separately for each part (multiple tags for one invoice), there is a \$10 fee for each additional tag required.
