Press Release – New Product

For Immediate Release

McFarlane is now the Master Distributor for Instrument Tech's FAA-PMA fuel quantity transmitters!

Baldwin City, KS, September 26, 2019: McFarlane has expanded their fuel quantity transmitter product line, now offering products for Piper and Maule aircraft!

In addition to McFarlane's current line of Stewart Warner fuel quantity transmitters for Piper and Cessna aircraft, they are now the master distributor for approved replacement transmitters manufactured by Instrument Tech!

Instrument Tech President & CEO, Bill Prewitt, stated they are excited to have McFarlane offer our products to the extended general aviation industry.

Instrument Tech fuel quantity transmitters are FAA-PMA approved direct replacements for original and hard to find Rochester and AC units! These high-quality transmitters are designed for use with the original OEM fuel quantity gauge and do not require any modifications to the fuel system.

Scott Still, President of McFarlane Aviation Products, stated "These PMA transmitters will solve fuel gauging problems for many Piper and Maule owners that we could not previously help."

About McFarlane

McFarlane is a diversified manufacturing company specializing in providing affordable, high quality FAA-PMA components for over 30 years. McFarlane offers many products including door and flight control cables, push-pull controls, cargo and seat rails and many other unique products for the broader aerospace industry. McFarlane also distributes many quality replacement aircraft parts from various manufacturers. For more information, go to www.mcfarlaneaviation.com or call 888-352-0076 or 785-594-2741.
