

mt-propeller

The MT-25 Aerobatic Propeller *"Best design and performance ever!"*

"I have flown nearly every Unlimited Aerobatic aircraft and propeller combination. The 'Dash 25' MT Propeller is the best in all aspects and has been my choice on the Pitts Viper Team for the past six airshow seasons. We have four Pitts Airshow Aircraft, all running MT propellers. I have 24 years both as a pilot and mechanic in the aerobatic industry. MT has a stellar performance and safety record. MT is my choice..."

- Jason Newburg - Viper AirShows

Win With a MT Prop!

Most Popular Performance Series

Foam core composite blades – Don't compare to the solid core MT

- Great looks and unique sound
- Turbine SMOOTH operation
- Lightest prop available
- Increased static thrust
- Square-tipped rigid blades
with less flex in high "G" maneuvers
- Improved climb
- Improved cruise and downline speeds
- No restricted propeller rpm ranges
- Repairable blades
- Unlimited blade and hub life
- Crankshaft bending is reduced by 1/3
- No crankshaft failures with E MT-Propellers
